LaparoVue™ Visibility System

All-in-One Solution
for improved laparoscopic visibility

www.buffalofilter.com
Laparoscopic Visualization
Complexity Made Simple

warms & white balances
• warms scope in 5 minutes to prevent fogging
• unit warms up to 5 hours
• allows for white balancing

cleans
• provides crisp, clear view in 5 seconds
• minimizes procedural delays
• radiopaque VueTip™ Trocar Swabs remove debris and excess liquid from trocar cannula
• x-ray detectable Microfiber Cloth designed to capture residue and particulates at a microscopic level

defogs
• pre-filled warming solution helps prevent intra-operative scope fogging

* Photographs are representative of a fogged and clear / defogged lens but do not reflect actual product use.
Unique Product Attributes

one unit, two ports
- two ports: warming / white balancing and cleaning / defogging
- fits 3mm–12mm scopes without port size converter
- allows for simultaneous use of both ports

detachable scope cradle
- safely and securely supports scope
- reduces tension on lens and potential for damage

built-in LED lights
- provides enhanced port visibility

ergonomic design
- stable base prevents tipping
- contoured, easy grip profile
- engineered with soft silicone material

Actual product may differ slightly in appearance to images shown.
